

*Your design is the most important part of your button.
The display area is the front flat area of button, before
it starts to curve around the edge of the button.
The bleed area is so that your background colors go all
the way around the edge of the button to the back.
At ButtonStar, you can view the guidelines for preparing
your art for buttons; view 1,000's of buttons designs
for ideas; get art for you button image; and sent you
image directly to ButtonStar.*
